Advance Health Care Directive

Please Note:

~ This is a personal document. You may alter it in any way you wish to make it convey your own views and life values.

~ Take your time in reading through this Advance Health Care Directive and think about what *your* wishes are in regards to health care treatments.

~ Choose your agent carefully, someone who knows you very well, and understands your life's values. Choose someone who will stand up and honor your wishes and is capable of making difficult decisions.

~ Your agent's role only becomes active if you cannot speak for yourself or communicate your health care decisions, unless you state otherwise.

~ Talk to your agent, family, and physician about what you want for yourself regarding health care wishes. It is the "key" in good advance health care planning. It is extremely beneficial in instituting your wishes, when family members have heard from you what it is that *you* want.

~ You can change or revoke your advance directive at anytime, verbally or in writing.

~ Your agent cannot consent to the following:
- Commitment to or placement in a mental health treatment facility
- Convulsive treatment
- Psychosurgery
- Sterilization
- Abortion
- Mercy killing, assisted suicide, or euthanasia

~ Please fill out an advance health care directive, do not burden your family with the stress of trying to determine your health care wishes when there is a crisis and you are unable to communicate.

Advance Health Care Directive

Introductory Information is Included as Part of this Document.

Here are the benefits of making out an Advance Health Care Directive.

- Your family and physician will not have to guess what treatment you want if you cannot speak for yourself. It protects them from making very difficult decisions.
- It opens the door for conversations so that your family, friends and your physician to know what YOU want done. This will help your family understand your wishes.
- You can stop worrying knowing that your health care decisions have already been made BEFORE a crisis strikes.

Some things you need to know:

- **You have the right** to give instructions about your own health care.
- **You also have the right** to name someone else to make health care decisions for you if you cannot make the decisions or communicate them.
- This form lets you write down your wishes regarding donation of organs.
- This form lets you designate who you want as your primary physician.
- This form can be used by anyone 18 or older, who is married, single, an adult child, a friend, or parent.
- **This form can be changed or revoked at anytime,** which includes a verbal statement to your health care provider, which must be documented in your medical record.
- **If there is any additional information you would like to convey, please include as an attachment to this document.**

Information on Power of Attorney (Agent)

Part 1 of this form permits you to name another individual as your Power of Attorney (**agent**) to make health care decisions for you if you are incapable of making those decisions for yourself. You may also choose to have someone else make those decisions for you, even though you are still capable. You may name an **alternate agent(s)** to act for you if your first choice is unavailable or unable to make decisions for you. Your agent may make all health care decisions for you, unless you choose to limit the authority of your agent.

- **Choosing the right person as your agent:**
  - Pick someone who knows you very well, cares about you, and can make difficult decisions. A spouse or family member may or may not be the best choice. You know who would be best, and who would be able to stand up for you and follow your wishes.
  - Whomever you choose, talk over your wishes with them, **your family members, and your physician**. If you have children, speak with all of them at the same time.

- **Your agent may not be**:
  - Your primary physician or other medical professional who has undertaken primary responsibility for your care.
  - An employee of the health care institution where you are receiving care, an operator or employee of a community or residential care facility where you are receiving care, unless your agent is an employee related to you by blood, marriage, adoption, or is your registered domestic partner, or is your co-worker at the same institution or facility.

- **If you choose not to limit the authority of your agent, your agent will have the right to:**
  - Consent or refuse consent to any care, treatment, service, or procedure to maintain, diagnose or otherwise affect a physical or mental condition.
  - Choose or discharge health care providers and institutions.
  - Agree or disagree to diagnostic tests, surgical procedures and medication plans.
  - Agree or disagree with providing, withholding, or withdrawal of artificial feeding and fluids and all other forms of health care, including cardiopulmonary resuscitation (CPR).
  - After your death, have your organs/tissues donated, authorize an autopsy, and make decisions about what will be done with your body.
  - Access medical records before and after your death.

If you change your mind about a Health Care Agent:

- Destroy all copies of your advance directive *Or*….
- Sign a statement that you revoke the designation of an agent Or…
- Write the word "REVOKED" in large letters across the name of each agent whose authority you wish to cancel and sign your name on that page.
- In addition, notify your agent, physician or family that you have canceled or changed your agent.

Signatures and Witnesses

- The form must be signed and dated by you and by two qualified witnesses or a notary. **A notary is not required if the form is signed by two witnesses.**
- If you are a patient in a skilled nursing facility, the ombudsman or patient advocate must witness the form.

If you have A Medical Emergency in California

If you have a medical emergency and ambulance personnel arrive, and you do not want cardiopulmonary resuscitation (CPR) when you are dying, you will need to have a **Do Not Resuscitate** form filled out and **signed by a doctor in your possession/home. An advance directive will not prevent them from performing CPR.**
